

Supplementary Fig. 1. Aclust tree of representative O-Lig sequences. The four subfamilies are shown in red, green, turquoise, and yellow. Seed sequences are marked with a red bar.

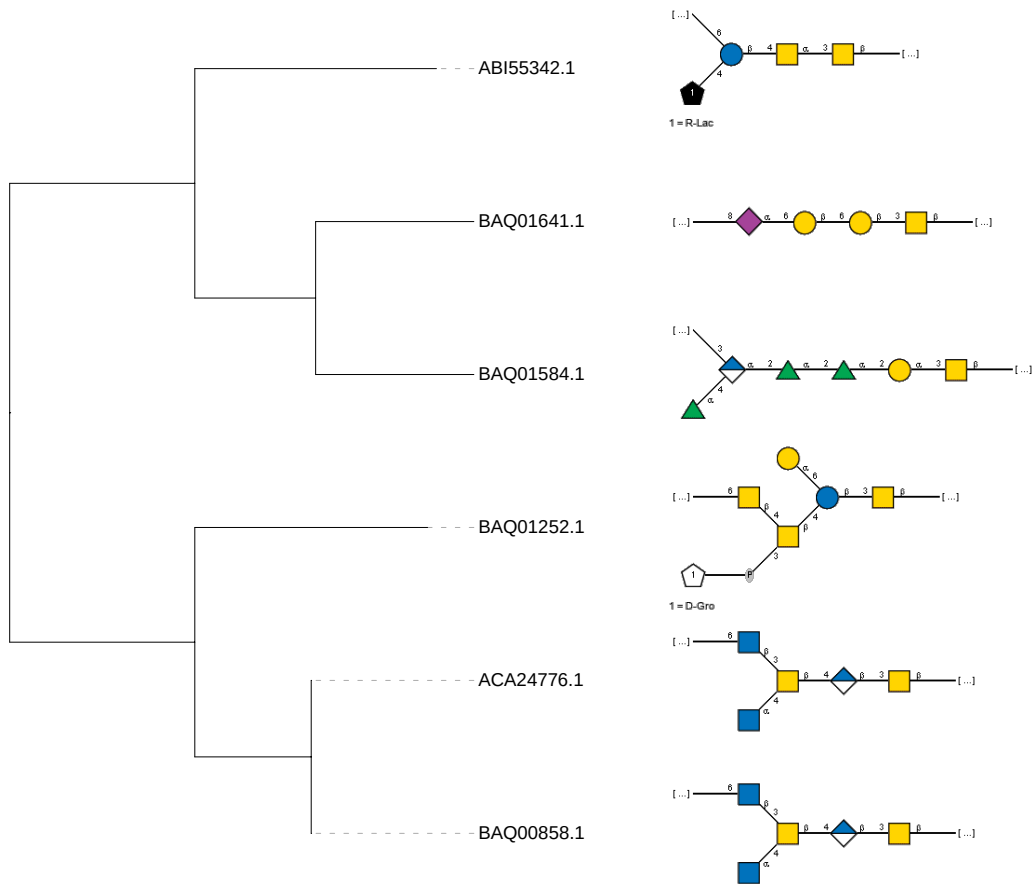

Supplementary Fig. 2. Phylogenetic tree of representative WadA homologs from the GTxx3 family, showing the taxonomic origin of the sequences and the domain modularity. N-terminal GT25 domains are shown in blue and GTxx3 domain in purple. The two-domain sequences segregate from proteins with a single domain GTxx3, suggesting co-evolution of the two domains.
